
ConformX Desktop Release Notes

DocuTech release notes are provided as a service to customers and integration partners. Any information expressed here is subject to change.

Previous release notes, as well as ConformX Desktop documentation, are available at knowledgebase.docutechcorp.com. Comments specific to release notes of any DocuTech documentation should be sent to info@docutechcorp.com.

9.0.21

<u>FogBugz Case #:</u>	<u>Description of Change</u>
1786	Other Paid Fees Sometimes the Other Paid Fees were not saving when switching from the Fees screen to another screen. This issue has been resolved, and those values should now save as appropriate.
1789	Point Import for large databases The ConformX Desktop loan import from Calyx Point has been updated if the customer is running Point 6.1 or higher. Previously if the database was large, importing a loan could sometimes take a long time. This issue has been resolved, and importing a loan should now be relatively fast regardless of the size of the database. We recommend that customers upgrade to Point 6.1 or higher and take advantage of this upgrade today.

Download and Install

You may begin using the enhancements and features in this version of ConformX Desktop by downloading either the "ConformX Desktop Version 9.0.21 Full Install" or the "ConformX Desktop Version 9.0.21 Update" from the DocuTech Website. These can be downloaded from the DocuTech Website at the following location: [DocuTech Website | Products | ConformX Desktop | Downloads](#). Current customers should use the "ConformX Desktop Update" and new customers should use the "ConformX Desktop Full Install." The ConformX Desktop 9.0.21 Release Notes are also available at the same location. Users of Point versions below 6.1 should also download and run the "Interface update for (Byte, Contour, Genesis 2000, Point Pre 6.1, DataTrac)" found at the same location.
